***Claim Rejections - 35 USC § 102***

The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

Claims 25-42 and 44-49 rejected under 35 U.S.C. 102(b) as being anticipated by Clarke or Clarke et al.

See the appropriate paragraph of the previous paper.

New claims 45-49 are directed to a plurality of markers. The Clarke references teach an indistinguishable apparatus and therefore would inherently have the ability to perform the claimed functions.

***Response to Arguments***

Applicant's arguments filed 12/29/03 have been fully considered but they are not persuasive.

Applicants state the instant invention comprises "a ratio comparison element" that permits identification of a marked liquid by comparing the measured concentration ratio with that in a stored look up table. Applicants state the Clarke references and Kaish fail to teach the claimed "ratio comparison element".

Exemplary of the Clarke references, Clarke et al.('679) teach in the abstract "...an indication of the presence and quantity of the fuel component in solution. From the determined fuel component quantity and known characteristics, the fuel solution properties are predicted....". Also Clarke et al. teach in column 6 lines 14+ a look up table(23) and associated processor and control unit(22) that determines the volume percent of the component of interest in the solution. Applicant state nowhere does

Art Unit: 1743

Clarke et al. a lookup table containing stored concentration ratios. This citation, from the same reference, teaches determination of a marker in a volume of fluid and compares the determination to a look up table(23) to identify the fluid. The Office maintains the Clarke references have been properly read on the claimed invention.

Applicant's remarks addressing Kaish were convincing and this rejection has been vacated.

**THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
